- **Frontend:** JavaScript ES6+, React, jQuery, SCSS, Webpack, npm, Gutenberg / Full Site Editing (FSE).
- **Infrastructure & DevOps:** Linux, Nginx, Docker, CI/CD, Git, GitHub Actions, WP-CLI, Bedrock, Capistrano, Automated Deployments.
- **Performance & SEO:** Core Web Vitals, CDN, advanced caching, technical SEO.
- **APIs & Integrations:** WordPress REST API, Stripe, Mailchimp, and other third-party service integrations.
- **AI-Assisted Engineering:** Claude and OpenAI integrated into code review, refactoring, and architecture workflows to increase delivery velocity.

PROFESSIONAL EXPERIENCE

ThemeForest Author (WolfThemes) – Independent Product Developer, Envato Market | 2011 – Present
(Remote)

- Generated \$2M+ in cumulative product revenue across 35,000+ sales by designing, building, and maintaining 40+ premium WordPress themes and plugins for a global customer base.
- Sustained a 4.5/5 average rating across 1,500+ customer reviews by directing a worldwide technical support team and maintaining a comprehensive product Knowledge Base.
- Kept 50+ high-traffic production sites online and performant by architecting Linux/Nginx infrastructure with automated, repeatable CI/CD deployment pipelines.
- Delivered complex custom WooCommerce and Elementor integrations for enterprise and agency clients by owning solution architecture end-to-end.

Freelance WordPress Developer | 2009 – Present (Remote)

- Shipped custom WordPress and WooCommerce sites optimized for speed and technical SEO by applying advanced caching, CDN, and Core Web Vitals best practices.
- Published themes on the official WooCommerce marketplace by meeting Automattic's strict code-quality and review standards.
- Extended client platforms with bespoke features and third-party integrations (Stripe, Mailchimp) by building on the WordPress REST API and modern PHP (OOP/Composer).

LANGUAGES

- **French:** Native
- **English:** Fluent (written & spoken)
