-

PROFESSIONAL EXPERIENCE

Lead Product Engineer & Systems Architect | *WolfThemes* | 2011 – Present

- Designed, developed, and maintained a portfolio of 40+ premium WordPress themes and plugins adopted by 36,000+ customers globally, generating over \$2M in cumulative revenue.
- Architected robust Linux/Nginx infrastructures with automated CI/CD pipelines (GitHub Actions, Bedrock, Capistrano), achieving 99.9% uptime across 50+ high-traffic sites.
- Led a worldwide technical support team, enforced high code quality standards, and maintained a comprehensive Knowledge Base, resulting in a 4.5/5 average customer rating across 1,600+ reviews.
- Delivered advanced custom solutions for enterprise clients, including complex WooCommerce and Elementor integrations.

Senior Freelance WordPress Developer | *Remote* | 2009 – Present

- Developed and optimized high-performance custom WordPress and WooCommerce platforms focused on speed, Core Web Vitals, and scalability.
 - Published specialized themes on the official WooCommerce marketplace, fully compliant with Automattic's strict code quality, security, and architectural standards.
 - Built custom REST API architectures and integrated third-party services (Stripe, Mailchimp, etc.) for complex client projects using modern PHP best practices.
-
